DETAILED ACTION

Notice of Amendment

1. In response to the amendment filed on 10/27/2006, amendment(s) to the specification, amended claim(s) 13, 16, and 17, canceled claim(s) 1-12, and new claim(s) 18-31 is/are acknowledged. The current rejections of the claim(s) 13-17 is/are *withdrawn*. The following new and reiterated grounds of rejection are set forth:

Drawings

2. The drawings were received on 10/27/2006. These drawings are --acceptable--.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –
(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 13-31 are rejected under 35 U.S.C. 102(e) as being anticipated by Jennings et al (US 6,747,917 B2) as broadly as *structurally* claimed.

5. Jennings et al discloses a menstrual cycle monitoring apparatus (as best seen in Figures 1-2), comprising:

- a string (100);

Art Unit: 3736

- a plurality of beads positionable on said string, including up to 32 indicators or bead types having varying colors, shapes, and sizes (column 2 line 28 – column 3 line 21); and
- an ovulation prediction kit (column 1 line 39 – column 2 line 9).

Response to Arguments

6. Applicant's arguments with respect to claims 18-31 have been considered but are moot in view of the new ground(s) of rejection.

7. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., the beads are not pre-positioned on the string) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3736
